

10th VMWARE User Group.be

11 may 2010

Agenda

13u00: **Welcome** (Erik Schils - UZLeuven)

13u10: **I/O Virtualisation with Virtual Connect Flex-10: the easy step to 10Gb converged networking** (HP - Geert Kuijken)

14u00 **Automate your vSphere environment with PowerCLI** (Luc Dekens)

14u45: **Break** offered by HP

15u00: **Secure your private cloud – how partners from the VMware ecosystem can use the VMsafe API to secure the private cloud** (Jan Tiri - VMWare)

15u45: **Trend Micro and VMSafe** (Dave Lawton - Trend Micro)

16u30: **Vmug Drink** offered by HP

Why a VMUG.be ?

We want more technical background, up to date information, future features and...

- to share experiences between users: how did you setup your infrastructure, who uses specific technology, how do you measure performance issues, ...
- to advise each other with problems and future implementations
- to have a (little) Belgian voice in the (big) VMWare company

How do we organize this

- Low profile (budget) user group: no fee and no administration
- 2-3 meetings a year: hosted by a VMUGmember or a sponsor
- try to focus on technical presentation (not too much sales)
- user experience
- a website : <http://www.vmug.be>

History

First Meeting on 25 April 2006

10th event !

Feedback Form

Please fill in the feedback form at the end of all the sessions. This will help us to improve the quality of our events.

**Fill in the feedback form and you also receive a VMUG.be polo
and**

At the end of the day there will be a price draw

Customer Case Studies Wanted

We are always looking for people who want to tell their VMWARE implementation on our next VMUG events.

Customer Case Studies Wanted

We are always looking for people who want to tell their VMWARE implementation on our next VMUG events.

Special Thanks to

- **HP for hosting our event**
- **And all the speakers**
 - Geert Kuijken (HP)
 - Luc Dekens (Eurocontrol)
 - Jan Tiri (VMWare)
 - Dave LAWTON (Trend Micro)

And the story continues... 1/2

11th VMUG : This is a special VMUG edition. Topics will include : storage, storage, storage, storage, storage and last but not least : Storage

We will have 6 storage vendors

- Netapp
- EMC
- HP
- IBM
- Compellent
- Dell

It will be a sales/technical vmware related presentation.

Want to get informed what kind of features and tools all the storage vendors have for you? Take this chance to get a quick overview.

And the story continues... 2/2

Register for this unique and storage only related VMUG event

- 15u45: Virusscanning in a VMWARE environment (Trend Micro)
- 16u30: Vmug Drink offered by HP

The VMware User Group (VMUG) program is designed to encourage and support communities of VMware users who want to hold regular meetings in their local area. The purpose of these gatherings is to provide a forum in which VMware users can share best practices and expertise, and VMware can in turn obtain feedback from the user community.

VMware User Groups are made up of independent communities of VMware users who get together to exchange ideas and information. There are many benefits to participating in a VMware User Group:

- Learn best practices and optimal use of VMware products
- Get answers, advice, tips, and suggestions from experts
- Discover new ideas and gain insight about Virtual Infrastructure
- Receive special information about new VMware products
- Network with other technical professionals in your area
- Be part of the leading edge of VMware users

Are you interested in helping to organize these meetings in the future? Please send an email to: info@vmug.be for more information. We look forward to meet with you on the next VMUG meeting in Belgium.

Best Regards,

The VMUG.be team
